Lucas Duchet-Annez

Notes

This directory contains my class notes and materials.

Contents

- Course notes for various subjects like Math, Physics, Computer Science, etc. All notes are in Markdown format.
- PDF versions of the notes generated from Markdown using pandoc.
- Some source code files.
- Diagrams and images referenced in notes.

Scripts

- `update.ps1` - Automatically updates and compiles the Markdown files to PDF on changes.
- `notes_converter` - Compiles Markdown files to PDF and opens the Markdown in Neovim and PDF in parallel. (located on the separate repository) [Link](#)
- `pdf.ps1` - Opens the compiled PDF.
- `edit.ps1` - Opens the Markdown file in Neovim for editing.
- `mpf.ps1` - Shortcut to start notes in Neovim and PDF viewer side-by-side.

This allows me to efficiently take notes in Markdown, automatically generate PDFs, and reference both formats.
